

2019 All Time Category Records by QTH

Congratulations to the 84 operations in 2019 that set a new all time category record for your QTH.

Notes:

1. With the 2013 Rule change splitting Mobile into Single-Op and Multi-Single a new series of all time records was started. Pre-2013 Mobile records have been documented separately and are available.
2. For purposes of All Time Category Records by QTH, Mobile stations are ranked according to their partial score generated just by their QSOs made in that QTH. Their overall total score is used in the All Time Category Records.
3. There was also a 2013 Rule change regarding 7th Area County Expeditions. Past scores have been re-stated into the new Single-County and County-Line categories based on historical records. Also, a County-Line station operating in multiple states has their score divided equally among the states operated in.
